

Hello, my name is Jamie and for about six months I have been a satisfied XM customer. I love XM and the fact there are no commercials and so many channels available. I am writing to respectfully urge the FCC to reject the NAB petition, 04-160. This would be the petition regarding local traffic and weather. I am a college student living in Connecticut, but I am from Philadelphia. I really enjoy using the XM local traffic and weather feature because it allows me to better plan my trips home. I can listen to the traffic along my route, from New York to New Jersey and into the city of Philadelphia. This is a feature is something that is not available through local radio stations, but have proved to be priceless in traveling. I can not only plan my trip before I leave Connecticut, but I can listen to updates along the way and change my course if need be. The fact is thousands of people use and love XM and the traffic and weather stations. Furthermore, we are paying for the use of XM and all that comes with it. Please reject NAB petition 04-160 and allow people such as myself to continue to use and enjoy XM and local traffic and weather.

Thank you for your time,

-Jamie
